CYCLE OF RICE IN
SOUTH INDIA
ABSTRACT - SOAR
Home - The maize weevil
(Sitophilus zeamais),
known in the United States
as the greater rice weevil, is
a species of beetle in the
family Curculionidae. It can
be found in numerous
tropical areas around the
world, and in the United
States, and is a major pest
of maize. Maize weevil -
Wikipedia - Loss caused to
rice production by this very
pest in different regions and
seasons varies from 5-90%.
Life History: Eggs are laid
on upper leaf surface in
masses of 15-80 and are
covered with buff-coloured
hairs. Rice Stem Borer
(Scirpophaga Incertulas):
